

Assignment Problem Statement:

Generate drawings for the individual injection molded parts that will assemble to create the final product. Generate engineering drawings for these injection molded parts.

Parts For Injection Molding Drawings and Engineering Drawings

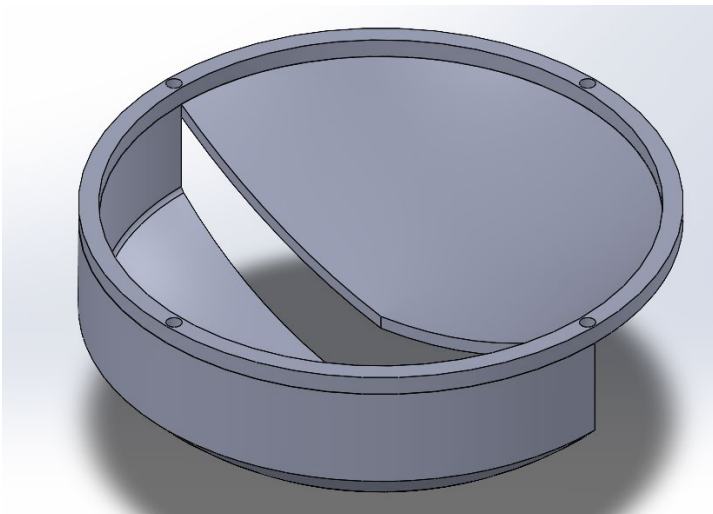

Top Part

The top part includes the outer ring and splash guard as well as hexagonal pins that will allow for a press fit to the bottom part

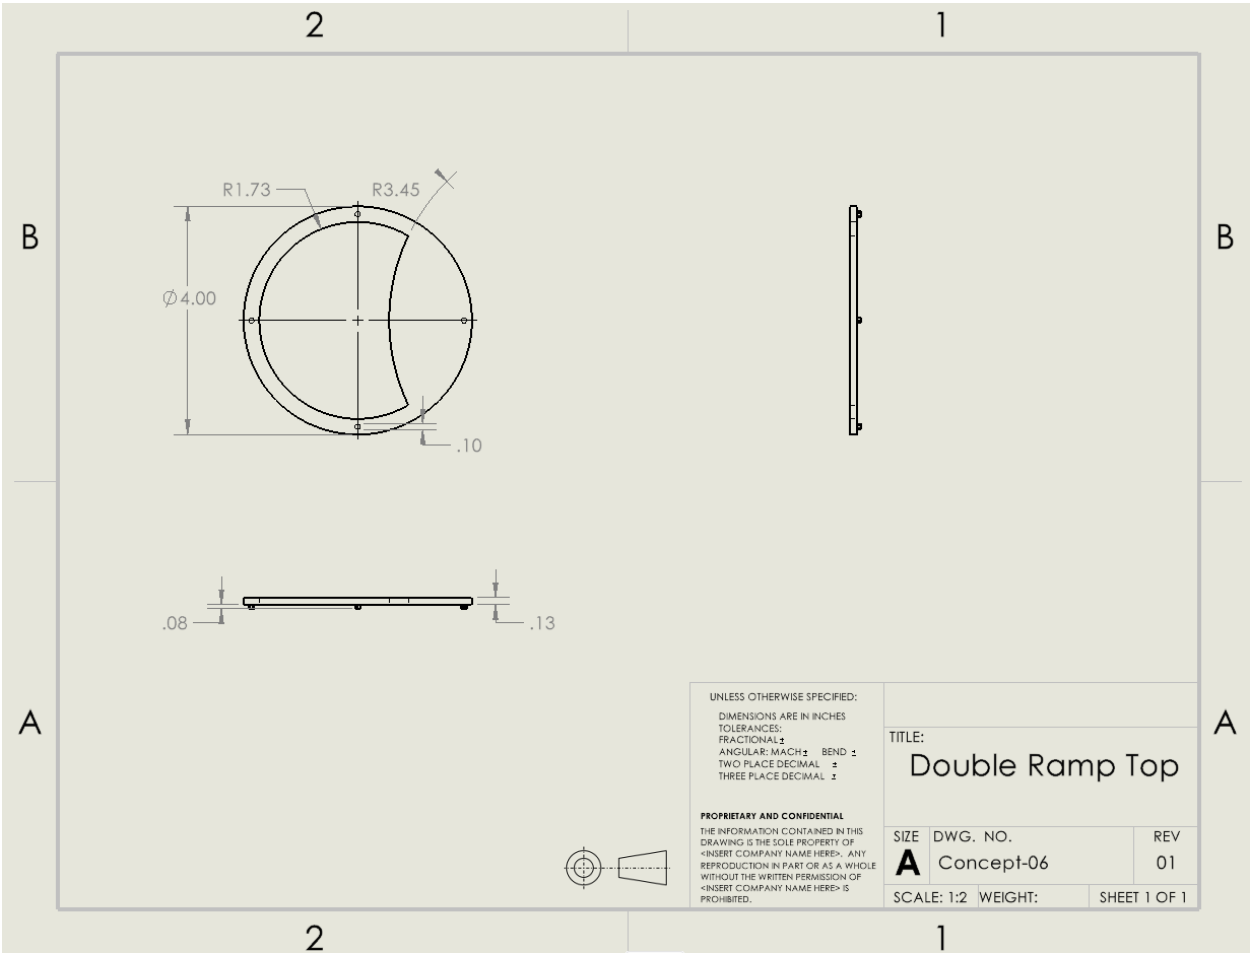

Bottom Part

The bottom part includes the two ramps. To ensure compatibility with injection molding the top ring has been drafted 1 degree and the thickness of the ramps and sides are uniform.

Assembly Engineering Drawings
